AWARDS AND ACHIEVEMENTS

MERN Stack Certification
TuteDude
07/2024 - 09/2024
Achievements/Tasks

- Link : https://ucarecdn.com/9d03344f-b95f-47ba-847c-998866929010/
- Learned the MERN stack by building simple full-stack projects using MongoDB, Express.js, React.js, and Node.js.
- Created REST APIs and used basic state management in React to improve user experience and functionality.

PERSONAL PROJECTS

Food Delivery Website (08/2024 - 09/2024)
- Created a basic food delivery website using React for the frontend and MongoDB for the database. The site allows users to browse food items, place orders, and track their orders. I also added simple payment integration and made sure the design works well on mobile devices.

Note-Taking Application (07/2024 - 08/2024)
- Built a note-taking app where users can sign up, log in, and create notes. The notes update in real-time and can be accessed from different devices. I also added basic security features to keep user data safe.

E-commerce Platform (02/2024 - 03/2024)
- Developed a simple e-commerce website where users can browse products by categories. I focused on creating an easy-to-use layout with smooth navigation. I also added basic product suggestions to help users explore more items.

CERTIFICATION

Mern Stack Developer - Futuremind Infotech Solutions (04/2025 - Present)
